BASIS FOR REJECTIONS

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

REJECTION OF CLAIMS OVER PRIOR ART

Claims 1-3, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Grierson (3,988,118). See column 4, fourth full paragraph, and Table 1 (columns 5 and 6) where the hot forming tool is shown to have a composition that falls within the claimed range. Applicants' narrow range is encompassed by Grierson's composition range.

Claims 4, 5 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grierson (3,988,118). While Grierson does not indicate that the tungsten based alloy is for use as an "extrusion" or "hot-forging" die, it is clearly evident that the skilled artisan familiar with this art would have recognized such a use. Clearly, Grierson contemplates this in light of the fact that Grierson comments that the disclosed alloy is "used to give *dies* and *other shaping members*

longer life” (paragraph bridging columns 7 and 8, emphasis added). As to the claims directed to the chromium range of 4 to 6% by weight,

PRIOR ART CITED BY EXAMINER

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

RESPONSE BY APPLICANT(S)

Applicant(s) response to be fully responsive and to provide for a clear record must specifically point out how the language of the claims patentably distinguishes them from the references, both those references applied in the objections and rejections and those references cited in view of the state of the art in accordance with 37 CFR 1.111 (a), (b) and (c).
